WHO WE ARE

Doctors Without Borders is an independent, global humanitarian organization that delivers medical care to those most in need. Our teams of over 65,000 doctors, nurses, logisticians, epidemiologists, mental health professionals, administrators, and others assist people caught in crises around the world.

In more than 70 countries, we save lives threatened by violence, disease, malnutrition, exclusion from health care, and catastrophic events.

Our decision to launch projects in any crisis is based solely on our expert assessment of people's medical needs, regardless of race, religion, gender or political affiliation.

Our independent, neutral and impartial funding allow us access to patients serve no agenda other than delivering quality medical care.

"It is extraordinary when you look around the world, whether it’s in Afghanistan or Yemen, or other war-torn places, even in the crisis of Ebola in West Africa. MSF seems to be the linchpin of survival, the difference between life and death for so many people in these forgotten, God-forsaken situations."
